## SUMMARY

DevOps Engineer with production-level freelance and lab experience spanning AWS, Kubernetes, Docker, Jenkins, and Terraform. Specializes in designing idempotent Infrastructure as Code, zero-downtime CI/CD pipelines, and secure cloud networking. Proven record of accelerating deployment cadence and implementing robust DevSecOps vulnerability gates.

## EXPERIENCE

### DevOps Engineer (Freelance)

Bengaluru, India

MAKSHA

Jul 2026 - Present

- Architected the cloud infrastructure for the firm's web platform on AWS, sustaining 99.9% availability across production workloads.
- Encapsulated backend services into Docker containers and orchestrated microservices on AWS EKS, accelerating deployment frequency by 65%.
- Standardized zero-touch delivery pipelines using Jenkins and Terraform, reducing configuration drift and provisioning time by 45%.
- Structured secure AWS networking architecture (VPC, private subnets, ALB, NAT Gateway, TLS/SSL termination) and migrated legacy data stores to Amazon RDS with zero data loss.
- Instrumented real-time cluster telemetry using Prometheus and Grafana dashboards, cutting mean-time-to-detect (MTTD) system anomalies by 50%.

### DevOps Trainee

Bengaluru, India

INTENSIVE DEVOPS BOOTCAMP

Jan 2026 – Jun 2026

- Provisioned resilient multi-tenant architectures across AWS EKS, EC2, ECR, VPC, and IAM roles following the principle of least privilege.
- Constructed parameterized Jenkins CI/CD workflows integrated with GitHub webhooks, trimming manual release effort by 80%.
- Packaged a high-performance Astro web app using multi-stage Docker builds and Nginx, reducing final container artifact sizes by 40%.
- Implemented automated quality and container vulnerability scanning stages via SonarQube and Trivy, blocking builds by enforcing a zero-tolerance policy for critical CVEs.

## TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, EKS, ECR, RDS, Lambda, S3, VPC, IAM, CloudWatch)
- **Containers & Orchestration:** Docker, Kubernetes, Helm, Argo CD, Docker Compose
- **CI/CD & Version Control:** Jenkins, GitHub Actions, Git, GitHub
- **Infrastructure as Code & Config:** Terraform, AWS CloudFormation, Ansible
- **DevSecOps & Code Quality:** SonarQube, Trivy, OWASP Dependency-Check, IAM Policies
- **Observability & Logging:** Prometheus, Grafana, AWS CloudWatch
- **Web & Networking:** Nginx, TCP/IP, DNS, HTTP/HTTPS, TLS/SSL, ALB, NAT Gateways
- **Scripting & Programming:** Python, Bash/Shell, SQL, JavaScript

## PROJECTS

### Three-Tier GitOps Architecture | Kubernetes, Docker, Argo CD, Helm

- Orchestrated a highly available three-tier application across Kubernetes worker nodes using Helm charts for modular environment overrides.
- Established a declarative GitOps workflow via Argo CD with automated synchronization, reducing staging-to-production promotion delays to under 2 minutes.
- Configured Prometheus metric exporters and custom Grafana visual alerts to continuously track pod CPU/memory utilization and ingress latency.

## End-to-End DevSecOps Pipeline | AWS EKS, Jenkins, Terraform, Argo CD, Trivy

- Engineered modular Terraform scripts to spin up secure, production-ready AWS EKS clusters on demand.
- Designed a multi-stage Jenkins pipeline executing continuous static analysis with SonarQube and container dependency auditing via Trivy and OWASP Dependency-Check.
- Connected automated artifact tagging in Amazon ECR with Argo CD continuous delivery, achieving completely hands-off application rollouts.

## AI-Assisted Full-Stack DevOps Project | React, FastAPI, PostgreSQL, Docker, Docker Compose, Temporal

- Engineered a high-concurrency URL platform utilizing FastAPI, asyncpg, and PostgreSQL with robust protection against SSRF and rate abuse.
- Integrated Temporal stateful workflow orchestration to manage asynchronous click analytics and recurring destination health checks.
- Programmed comprehensive Pytest test suites achieving 82% code coverage across 57 automated unit and integration tests.

## EDUCATION

---

**BMS College of Engineering**

Bengaluru, India

**B.Tech - CGPA 7.43**

Oct 2018 – July 2024

## CERTIFICATIONS

---

- AWS Zero to Hero – Cloud & DevOps Certification (TWS)
- Python for DevOps Engineers (TWS)
- Cloud Computing Specialist Certification (TuteDude)
- Web Development & Architecture Workshop (BMSCE)

## LANGUAGES

---

- **Languages:** English (Professional Working Proficiency), Hindi (Native)
