SUMMARY

DevOps Engineer with hands-on experience across AWS, Kubernetes, Docker, Jenkins and Terraform. Skilled in CI/CD automation, Infrastructure as Code, cloud migration, networking, security and observability. Built production-style DevOps projects with AWS EKS, GitOps, DevSecOps tooling and automated testing.

EXPERIENCE

DevOps Engineer – Freelance Project | MAKSHA

Bengaluru, India

- Owned the end-to-end DevOps lifecycle for the firm's website, covering AWS infrastructure, containerization, deployment and operations.
- Containerized workloads with Docker, deployed applications on AWS EKS, and supported migration of the database to Amazon RDS.
- Established repeatable multi-environment delivery with Jenkins CI/CD and Terraform Infrastructure as Code.
- Configured secure and observable AWS networking with VPC, ALB, NAT, Security Groups, VPN, DNS and TLS; added Prometheus and Grafana monitoring.

DevOps Training & Bootcamp

Pune, India | Jan 2026 – Jun 2026

- Completed hands-on projects covering AWS, Docker, Kubernetes, Jenkins, Terraform and DevSecOps.
- Administered AWS EKS, EC2, ECR, VPC and IAM alongside Kubernetes Deployments, Services, Namespaces and Ingress.
- Created Jenkins CI/CD workflows and Terraform infrastructure to standardize repeatable deployments.
- Containerized an Astro portfolio with Nginx and Docker Compose, exposed it through ngrok and verified the deployment end-to-end.
- Integrated SonarQube, Trivy, Prometheus and Grafana for code quality, security scanning and observability.

TECHNICAL SKILLS

Cloud: AWS (EC2, EKS, ECR, RDS, Lambda, S3, VPC, IAM, CloudWatch)

CI/CD: Jenkins, GitHub Actions, Git, GitHub

Containers & Orchestration: Docker, Kubernetes, EKS, Helm, Argo CD, kubectl

Infrastructure as Code: Terraform, AWS CloudFormation

Automation: Ansible, Chef, Bash/Shell, Python

DevSecOps: SonarQube, Trivy, OWASP, Container Security

Observability: Prometheus, Grafana, CloudWatch

Networking: TCP/IP, DNS, SMTP, HTTP/HTTPS, TLS, ALB, NAT, Security Groups, Nginx

Programming & Data: Python, Java, JavaScript, SQL, MongoDB

Systems & Tools: Linux, Windows, curl, wget, apt

Practices: SRE, Cloud Migration, Agile

PROJECTS

Argo CD Three-Tier GitOps Project | Kubernetes, Docker, Argo CD, Helm

- Deployed a three-tier application on Kubernetes using Docker, Helm and Argo CD.
- Implemented GitOps delivery with automated application synchronization; managed Kubernetes manifests and environments through Git.
- Added Prometheus and Grafana to monitor application and cluster health.

End-to-End DevSecOps Kubernetes Project | AWS EKS, Docker, Kubernetes, Jenkins, Terraform, Argo CD, SonarQube, Trivy, OWASP Dependency-Check

- Provisioned AWS EKS infrastructure with Terraform and deployed a containerized application using Kubernetes.
- Built Jenkins pipelines with SonarQube, Trivy and OWASP Dependency-Check to automate code quality and security checks.
- Connected the delivery workflow to Argo CD for automated Kubernetes deployments and GitOps-based release management.

AI-Assisted Full-Stack DevOps Project | React, FastAPI, PostgreSQL, Docker, Docker Compose, Temporal

- Built a containerized URL shortener with React, FastAPI, PostgreSQL, Docker and Docker Compose.
- Implemented Temporal workflows for asynchronous click tracking and scheduled URL safety re-checks, with SQLAlchemy, Alembic, asyncpg, rate limiting and SSRF protection.
- Created Pytest automation with 57 passing tests and 82% coverage; used Git, GitHub and Claude Code for development, testing and documentation.

EDUCATION

BMS College of Engineering (BMSCE) – Bengaluru, India | B.E. in Civil Engineering | 2018 – 2023 | CGPA: 7.43/10

CERTIFICATIONS

- AWS Zero To Hero – Cloud/DevOps learning certification, TWS
- Cloud Computing – Certification, TuteDude
- Python for DevOps – Certification, TWS
- Web Development for Coders Workshop – BMSCE PhaseShift

LANGUAGES & INTERESTS

Languages: English (Fluent), Hindi (Native) | **Interests:** Badminton, Reading
